

Upgrading to Splunk Enterprise 6.5

How Sayers can help:

A Sayers vendor certified architect will collaborate with your team to discuss best practices for upgrading to Splunk Enterprise 6.5. The features and enhancements available in Enterprise 6.5 are intended to provide significant reductions in operational overhead, and data ingestion benefits by any serious Splunk user. However, the upgrade is not without risks. Sayers is here to help you navigate this process with a plan specific to your environment.

What the client will receive:

Receive Splunk Enterprise 6.5 deliverables that include:

- ✔ How the new Enterprise 6.5 features and enhancements will benefit your environment
- ✔ High Level Upgrade Strategy/Process
- ✔ Risks associated with upgrade
