

NAS STORAGE ASSESSMENT

OVERVIEW

The NAS Storage assessment provides organizations fast and meaningful insights for smarter data decisions. Through a non-disruptive data analytics process, you can build out a more informed strategy and identify opportunities to drive down the cost of storage.

UP TO 70% OF CURRENT UNSTRUCTURED DATA STORED MIGHT BE COLD DATA, UNNECESSARILY INCREASING STORAGE SPEND.¹

IDC EXPECTS A 65% GROWTH OF AN ORGANIZATIONS UNSTRUCTURED DATA EVERY YEAR.²

ASSESSMENT PROCESS

PLAN

Any valuable assessment begins with a properly developed plan of attack. Receive a 30 minute live demo and planning session to identify goals.

DEPLOY

After planning, we schedule a 1 hour remote session to deploy a virtual appliance for data gathering.

ANALYZE

We will analyze up to 250TB of data to provide a sufficient sample size for evaluation.

EVALUATE

Within 30 minutes of deployment and analysis you will begin to see real-time analytics across your NAS environment.

CONSULT

After a thorough data evaluation, we offer an additional 1 hour custom consultation to review findings and provide a report identifying recommendations to reduce storage spend.
