

Sayers Technology Center of Excellence

Sayers Technology Center of Excellence (CoE)

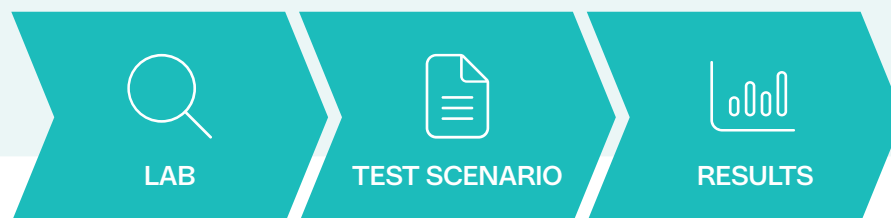

A Creative Engineering Sandbox engaging in the areas of Cybersecurity, Infrastructure, Modern Computing, Cloud, AI and more.

Mission - To establish an environment that will continuously adapt and modernize to foster Internal, Client and Partner engineering enablement where we can all experience, learn, prepare and test solutions we sell and support to obtain the significant understanding, knowledge and value that leads to extraordinary success.

- ✓ Highly Customizable Customer Research and Demonstration Environment
- ✓ Full Complement of Cybersecurity and Infrastructure Hardware & Software Platforms currently available for Customer Demo's and Testing
- ✓ Bring Your Own Hardware or Software to Sayers COE to Reduce POC\POV Timelines & Resource Constraints
- ✓ Generative and Agentic AI Demo, Testing, and Training Capabilities – LLM Comparison, RAG, Fine Tuning
- ✓ On-Prem and Public Cloud Connectivity for Hybrid & Multi-Cloud Functionality Testing
- ✓ Secure, Multi-Tenant Architecture with 24x7 Access to the Environment

SOLUTION TESTING AND DESIGN USE CASES

- ✓ Architectural Design Validation
- ✓ Integration Testing
- ✓ GenAI Fundamentals Training & Bring Your Own Use Cases
- ✓ Traffic, Load & Performance Measurements via BreakingPoint – Bandwidth, Connections, Latency, Packet Loss, etc...
- ✓ Lab as a Service
- ✓ Proof of Concept as a Service

WHY SAYERS?

Sayers understands that every organization's requirement and objective are unique, which is why we developed a methodology to provide tailored assessments, strategies and solutions that align with your organization's risk management goals. Sayers has an established record of delivering high-caliber consulting, implementation, onboarding, and lifecycle services.

These offerings are available as an ongoing services, rather than a one-time engagement, to provide long-term resilience improvements facilitated by our engineering experts. Sayers' goal is to partner with our clients to ensure their resilience solutions are effective, maintained and provide the ROI as originally intended.
