

Sayers Business Resilience Capabilities

CONVERSATION STARTERS:

- ✓ How confident are you that you can quickly and safely recover from a Ransomware attack?
- ✓ What are your recovery options for data in SaaS platforms like M365, SalesForce, Jira?
- ✓ How are you protecting your critical enterprise identities in Active Directory, Entra ID, and Okta?
- ✓ When is the last time your organization performed a Business Impact Analysis (BIA)?
- ✓ Do you have defined Recovery Point Objectives (RPO's) and Recovery Time Objectives (RTO's)?
- ✓ When is the last time you tested/verified recoverability and RPOs/RTOs are successfully being met?

Maturity Assessments

High Level assessment of your current Disaster Recovery and/or Cyber Recovery posture with the goal of helping you prioritize improvement opportunities and justify budget for this area.

Business Impact Analysis

Helping organizations quantify the cost of downtime of your critical business applications by performing a deep-dive analysis of your IT infrastructure to provide detailed recommendations for verified resiliency across all application tiers across the organization.

Roadmap Sessions & Quarterly Business Reviews

Keeping you up to date with current Business Resilience industry topics and trends, product updates & roadmaps, emerging vendors, and discussing challenges that similar organizations are facing and how Sayers is helping them overcome those challenges.

Data Protection Platform Health Check

Making sure you are on the latest version of your data protection platform and adhering to industry Best Practices – i.e. immutable and air-gapped recovery points.

STRATEGIC PARTNERS – BUSINESS RESILIENCE

Sayers Business Resilience Capabilities

WHY SAYERS?
