

# Cyber Investment Optimization Assessment

## A CLEAR VIEW OF YOUR SECURITY POSTURE

Sayers Cyber Investment Optimization Assessment is designed to provide organizations with a strategic, objective look into their security program and posture.

This assessment will help to provide a clear, holistic view of an organizations cybersecurity and cybersecurity adjacent technologies. From there, Sayers subject matter experts will review, categorize, and quantify the technology and process components that make up a given organization's environment. The end-result is a deliverable an organization can then review and use to perform a further, targeted analysis of the security program, build business cases, or observe biases in past security spends.

## CYBER INVESTMENT OPTIMIZATION FEATURES

- Analyzes technologies and solutions mapped to industry-standard frameworks to provide critical insight into security posture
- Built utilizing well-known industry projects and frameworks and improved upon by Sayers subject matter experts
- Normalizes useful and relevant terminology rather than industry jargon
- Low-to-zero cost
- Delivered by highly experienced industry experts
